Engagement Insight Hub - The aim

1

Support collaboration between organisations around gathering insight by enabling links to be made between individuals/organisations who are working on the same area, or are wanting the answers to the same questions. Maximising scarce resource.

2

Move away from seeing residents as patients or service users but as **members of local communities** with valuable experience and insight to share.

3

Support the use of a variety of methods for gathering insight, moving away from an over-reliance on surveys to methods that nurture and use existing relationships.

4

Collect and organise insight being gathered across the system to make it **easily accessible and searchable**.

PHASE THREE

Community Engagement - multiple avenues

- Community relationship and trust
- Community participation
- Co-design, co-deciding, co-producing
- Community leadership
- Community led action/interventions
- Connections between community led interventions, services led interventions and system led interventions
