<b>Directorate &amp; Service Area</b>	Adults, Health Partnerships and Housing
<b>Report Name</b>	2024/24 Inflationary uplift
<b>Report date</b>	
<b>Report author &amp; role</b>	Matthew Jenkins- Assistant Director Commissioning and Performance
<b>Proposal Summary</b>	This report seeks approval for the annual inflationary uplift of contracted Adult Social Care Providers
<b>Export filename</b>	2024/24 Inflationary uplift CCIA 22.03.24 .png

Category	Impact	Notes / Justification for score / existing work (see guidance sheet or CCIA detailed notes for more information)	Score (-5 to +5)	Mitigations (If the impact is negative, please provide a mitigating action for reducing the impact going forward)
Buildings	Building construction	Report awards uplift to existing providers to ensure we (The Council) meet statutory duties as outlines in section 5 of The Care Act and does not directly contribute to any new construction or development.		
Buildings	Building use	Report awards uplift to existing providers to ensure we (The Council) meet statutory duties as outlines in section 5 of The Care Act and does not directly contribute to any new construction or development.		
Buildings	Green / blue infrastructure	Report awards uplift to existing providers to ensure we (The Council) meet statutory duties as outlines in section 5 of The Care Act and does not directly contribute to any new construction or development.		
Buildings				
Business	Developing green businesses	The paper proposes an uplift to existing contracted providers and therefore does not directly contribute towards developing green businesses. However, as commissioners we are keen to work with our contracted providers and use our voice and role as a large commissioner to influence providers actions. We will continue to encourage utilisation of green technologies with our contracted providers however, that is not directly in scope of this paper.		
Business	Marketable skills & training	The paper proposes an uplift to existing contracted providers and therefore does not directly contribute towards developing green businesses. However, as commissioners we are keen to work with our contracted providers and use our voice and role as a large commissioner to influence providers actions. We will continue to encourage utilisation of green technologies with our contracted providers however, that is not directly in scope of this paper.		
Business	Sustainability in business	The paper proposes an uplift to existing contracted providers and therefore does not directly contribute towards developing green businesses. However, as commissioners we are keen to work with our contracted providers and use our voice and role as a large commissioner to influence providers actions. We will continue to encourage utilisation of green technologies with our contracted providers however, that is not directly in scope of this paper.		
Business				
Energy	Energy efficiency	The paper proposes an uplift to existing contracted providers and therefore does not directly contribute towards developing green businesses. However, as commissioners we are keen to work with our contracted providers and use our voice and role as a large commissioner to influence providers actions. We will continue to encourage utilisation of green technologies with our contracted providers however, that is not directly in scope of this paper.		
Energy	Reducing energy demand	The paper proposes an uplift to existing contracted providers and therefore does not directly contribute towards developing green businesses. However, as commissioners we are keen to work with our contracted providers and use our voice and role as a large commissioner to influence providers actions. We will continue to encourage utilisation of green technologies with our contracted providers however, that is not directly in scope of this paper.		
Energy	Switching to low-carbon energy supply	The paper proposes an uplift to existing contracted providers and therefore does not directly contribute towards developing green businesses. However, as commissioners we are keen to work with our contracted providers and use our voice and role as a large commissioner to influence providers actions. We will continue to encourage utilisation of green technologies with our contracted providers however, that is not directly in scope of this paper.		
Energy				
Influence	Communication & engagement	There is no direct impact on climate change awareness. However, the decision to award and inflationary uplift to contracted providers does support us in having a distinct cohort of providers to work with and we are able, through our influential voice, have greater focused engagement with independent providers to encourage them to adopt/invest in technologies or practices to support better practices from a climate/emissions perspective		
Influence	Wider influence	There is no direct impact on climate change awareness. However, the decision to award and inflationary uplift to contracted providers does support us in having a distinct cohort of providers to work with and we are able, through our influential voice, have greater focused engagement with independent providers to encourage them to adopt/invest in technologies or practices to support better practices from a climate/emissions perspective		
Influence	Working with communities	There is no direct impact on climate change awareness. However, the decision to award and inflationary uplift to contracted providers does support us in having a distinct cohort of providers to work with and we are able, through our influential voice, have greater focused engagement with independent providers to encourage them to adopt/invest in technologies or practices to support better practices from a climate/emissions perspective		
Influence	Working with partners	There is no direct impact on climate change awareness. However, the decision to award and inflationary uplift to contracted providers does support us in having a distinct cohort of providers to work with and we are able, through our influential voice, have greater focused engagement with independent providers to encourage them to adopt/invest in technologies or practices to support better practices from a climate/emissions perspective		
Influence				
Internal Resources	Material / infrastructure requirement	This activity does not result in us using more or less of our existing infrastructure, supplies and council resources		
Internal Resources	Staff time requirement	Staff do not have to work more or less on this activity		
Internal Resources	Staff travel requirement	This activity does not mean that staff will need to travel more or less		
Internal Resources	External funding	We are not able to leverage additional support for the activity from external funders		
Internal Resources				
Land use	Carbon storage	This project does not result in a net increase or decrease in land carbon storage		
Land use	Improving biodiversity adaptation	This activity does not help or hinder the natural world's ability to cope with climate change		
Land use	Natural flood management	This activity does not reduce or increase the risk of flooding due to changes in land use		
Land use				
Procurement	Food & Drink	N/A		
Procurement	Products	We are not increasing overall consumption of products or decreasing them		
Procurement	Single-use plastic	N/A		
Procurement	Services	Within the terms and conditions of the contracts where an inflationary uplift is being awarded (clause 16.1) providers are required to perform their obligations in accordance with the Authority's environmental policy, which is to conserve energy, water, wood, paper and other resources, reduce waste and phase out the use of ozone depleting substances and minimise the release of greenhouse gases, volatile organic compounds and other substances damaging to health and the environment. There is regular engagement with contracted providers via weekly bulletins, newsletter and quarterly forums where good practice is shared. Every provider will have an annual quality monitoring visit to ensure compliance with the contract.	+1	
Procurement				
Transport	Decarbonising vehicles	This activity does not increase or decrease the use of fossil-fuelled vehicles		
Transport	Improving infrastructure	This activity does not increase or decrease the opportunities within the borough for low carbon forms of travel		
Transport	Demand reduction	This activity does not decrease or increase the need for motorised travel or promote sustainable modes of transportation		
Transport	Supporting people to use public transport	This activity does not relate to public transport		
Transport	Supporting people to use active travel	This activity does not relate to active travel		
Transport				
Waste	End of life disposal / recycling	This activity is not expect this activity to increase or decrease the proportion of waste which is recycled		
Waste	Waste volume	N/A		
Waste				
Adaptation	Drought vulnerability	N/A		
Adaptation	Flooding vulnerability	N/A		
Adaptation	Heatwave vulnerability	Heatwaves may have an impact as the activity includes supporting individuals who may be vulnerable to heatwaves due to their health. We ensure alongside Public Health that we provide advice and support about heatwaves		
Adaptation				
Water Use	Improving water-use efficiency	N/A
