The YTD sickness shows that we are lower than the benchmark so far in 2021/22 for short term sickness and higher than the benchmark for long term sickness. (Note:- the YTD sickness may total up slightly differently to the monthly sickness rates reported as monthly sickness is recorded on the 1st of following month, each month and the YTD sickness is calculated at the end of the year to date period. So for January the YTD sickness is recorded on the 1st March. This can therefore lead to slight discrepancies as sickness days will have been added retrospectively throughout the year.)

Performance has continued to improve with volume being lower than previous months. This shows that the processes in place work provided there is sufficient resource to back it up.
TBC	T12	% Environmental Information Regulation Requests completed in 20 working days	 <p>Legend: Actual (Blue), Target (Red), Trend (Green)</p>	93%	98.82%	99.07%	98.71%	98.98%	99.32%	100.00%	↑ G	85%	11 active requests as at 22/02. The IG team need to remain vigilant on performance as they will soon be taking on full responsibility for the processing of EIR requests which is an increase to their already high workload.
TBC	T13	% Individual Rights Requests completed in 1 calendar month	 <p>Legend: Target (Red), Actual (Blue), Trend (Green)</p>	81%	74.42%	92.68%	100.00%	85.00%	100.00%	66.67%	↓ R	90%	3 active requests as at 22/02. Lack of resource across supporting directorates impacted results this month. The team will continue to analyse their performance to ensure improvements can be made where applicable. Staff members within IG continue to receive training in this area which should enhance performance moving forward.

Due to the Covid pandemic reassessments have not been carried out resulting in a big reduction in those businesses having awards and eventually all of them will expire. The project needs a complete rebrand and restart now that we are North Northants. TBC	T60a	Household kerbside collection: Tonnes of material collected through kerbside schemes - Co-mingled recycling		n/a	9212.66	8747.31	8616.33	29872.02	3125.14	3295.72	↑	No polarity	No target - tracking indicator only	January tonnages are always higher due to increased recyclable material over the Christmas period. Q2 data is now verified. This is a relatively stable waste stream, however performance is impacted by the level of contamination created by residents who put the wrong waste in the recycling bin. The Council continues to raise awareness and engage with residents to ensure that co-mingled recycling is clean and not contaminated by wet or dirty materials which affect the performance and presents significant financial risk to the Council when dealing with rejected loads of recyclable material.
TBC	T60b	Household kerbside collection: Tonnes of material collected through kerbside schemes - Food waste		n/a	990.28	986.16	975.96	3284.4	339.26	332	↓	No polarity	No target - tracking indicator only	Q2 data is now verified. Food waste is currently collected in East Northants and Corby. Factors that affect food waste performance include the level of multiple deprivation, and the availability of alternate capacity such as residual containers. The waste team intend to carry out awareness raising activity during 22/23 to increase participation in food waste collection. Removal of food waste from other waste streams, such as residual waste, is a key activity for effective waste collection systems, and requirements of The Environment Bill 2021 mean that food waste collections should be extended to all households from 2025.
TBC	T60c	Household kerbside collection: Tonnes of material collected through kerbside schemes - Garden waste		n/a	8387.75	8532.85	3789.60	21207.08	424.92	496.88	↑	No polarity	No target - tracking indicator only	Garden waste tonnages are affected by the greatest amount of seasonal variance and is not collected in Wellingborough during the period November to March. Yields for this material increase during Q1 and Q2 and drop off in the winter by approximately 60%. Arisings for garden waste are also affected by weather conditions, in dry years, the overall yield will be reduced.

TBC	T65	Percentage of waste treated (residual kerbside waste, HWRC, wood)		n/a	90.95%	91.48%	93.12%	91.90%	93.60%	92.60%	↓	No polarity	No target tracking purposes only	While the quantity of waste can fluctuate, the percentage of waste treated is relatively stable, being managed through contract requirements.
TBC	T66	Percentage of waste re-used, recycled, composted from HWRC sites		43.2%	40.01%	42.49%	39.34%	40.18%	35.36%	34.30%	↓	Higher is better	No target tracking purposes only	Quality and quantity of waste that can be reused, recycled or composted is subject to variation throughout the year. Lower visitor numbers in winter months means a reduction in total waste and therefore reduction of percentage waste reused, recycled or composted. There is also no guarantee that the quality of waste being brought to the Household Recycling Centres (HWRC) is fit for reuse or recycling, therefore these can see monthly variations. Compost tonnages is the area most affected by seasonal variance so yields for this material drop off in the winter.

TBC	T70	Number of new concerns received		n/a	607	702	804	2336	243	223	↓G	Lower is better	No target - tracking indicator only	Please note historical figures often retrospectively increase slightly due to input delay.
TBC	T71	New concerns determined to be enquiries (both s42 and other) *(A S42 enquiry must take place if there is reason to believe that abuse or neglect is taking place)		n/a	163	182	261	666	63	60	↓	No polarity	No target - tracking indicator only	This is not a productivity measure as such it just shows the volume of potential enquiries. If a concern is determined to be an enquiry then that means there will be more work as a result. However, an LA can't control if something is S42. However we would want to monitor receiving large numbers as this would be a burden on the teams that carry out the enquiry stage of the process. Please note that historical figures often retrospectively increase slightly due to input delay.

Whilst we always want to avoid admissions to care homes this will always increase since care home admission is the right move for some people.

Some patients may be residents of West Northants but registered to a GP in North Northants. These patients are included in the North rather than West.
TBC	T80	% of in-year eligible population who received an NHS Health Check		0.6%	0.8% (Jun 2021)	1.6% (Sep 2021)	0.69% (Dec 2021)	0.74% (Jan 2022)	0.69% (Dec 2021)	0.74% (Jan 2022)	↑G	Higher is better	5% (60% annual target)	GPs are still very much recovering and capacity to deliver NHS Health Checks in practices is still limited, considering the winter pressures and the backlog from the 1st and 2nd wave that GPs have to focus on. Compared with national figures, we are much in line with national performance. Benchmark is England Q1 2021/22. (Reported monthly only so latest value is reported at each quarter and YTD)
