

# Scrutiny Commission

17 May 2022

Update on progress in establishing an Integrated Care System across Northamptonshire & place-based development in North Northamptonshire

## **Integrated Care, the Health and Wellbeing Board & Place based approaches**

- ❖ We have a unique opportunity to shape the partnerships that will become a fundamental part of supporting and working with our diverse communities.
- ❖ There are significant changes across health and care systems and new structures that will be fundamental in trying to create the right environment for people, families and communities to thrive
- ❖ We need to hold on to the community contributions but go further working with businesses, voluntary and charitable sector, higher education, culture and leisure sectors and fully involve people and community leaders so to maximise their unique contribution, knowledge and skills
- ❖ Every community should feel valued and that the plan for their area meets the needs of people and groups in that community
- ❖ All organisations need to be prepared to allow others to control and influence and think about using assets very differently or assets that we haven't used before

# Summary Update

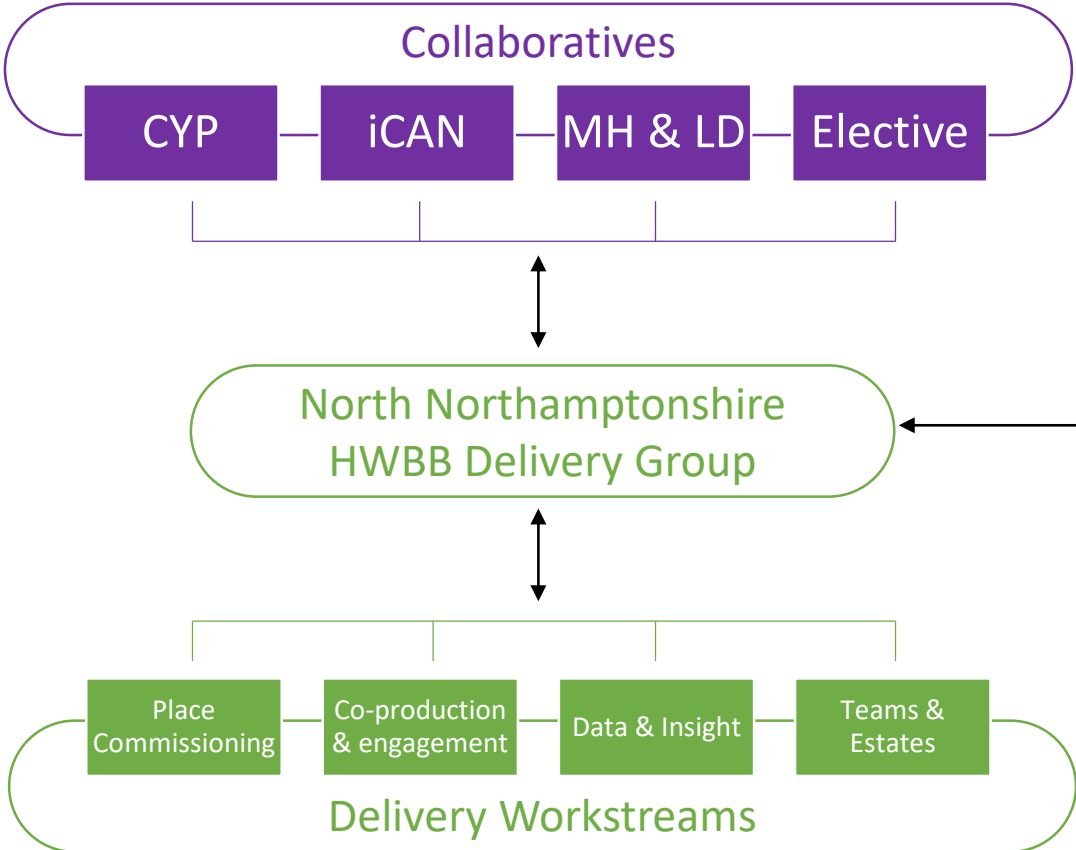

## Progress

- Chief Executive Designate – Toby Sanders
- Chair Designate – Naomi Eisenstadt
- Integrated Care Board (ICB) – 1 x shadow meeting to date
- Integrated Care Partnership – 1<sup>st</sup> shadow meeting 31 May 2022

## Next Steps

- Strategy Development (Sep 22)
- Ongoing place based development
- ICP membership & Development
- Clarity of board responsibilities and relationship with collaboratives
- Devolution (ambition in to delivery)

# Place Development so far in North Northamptonshire

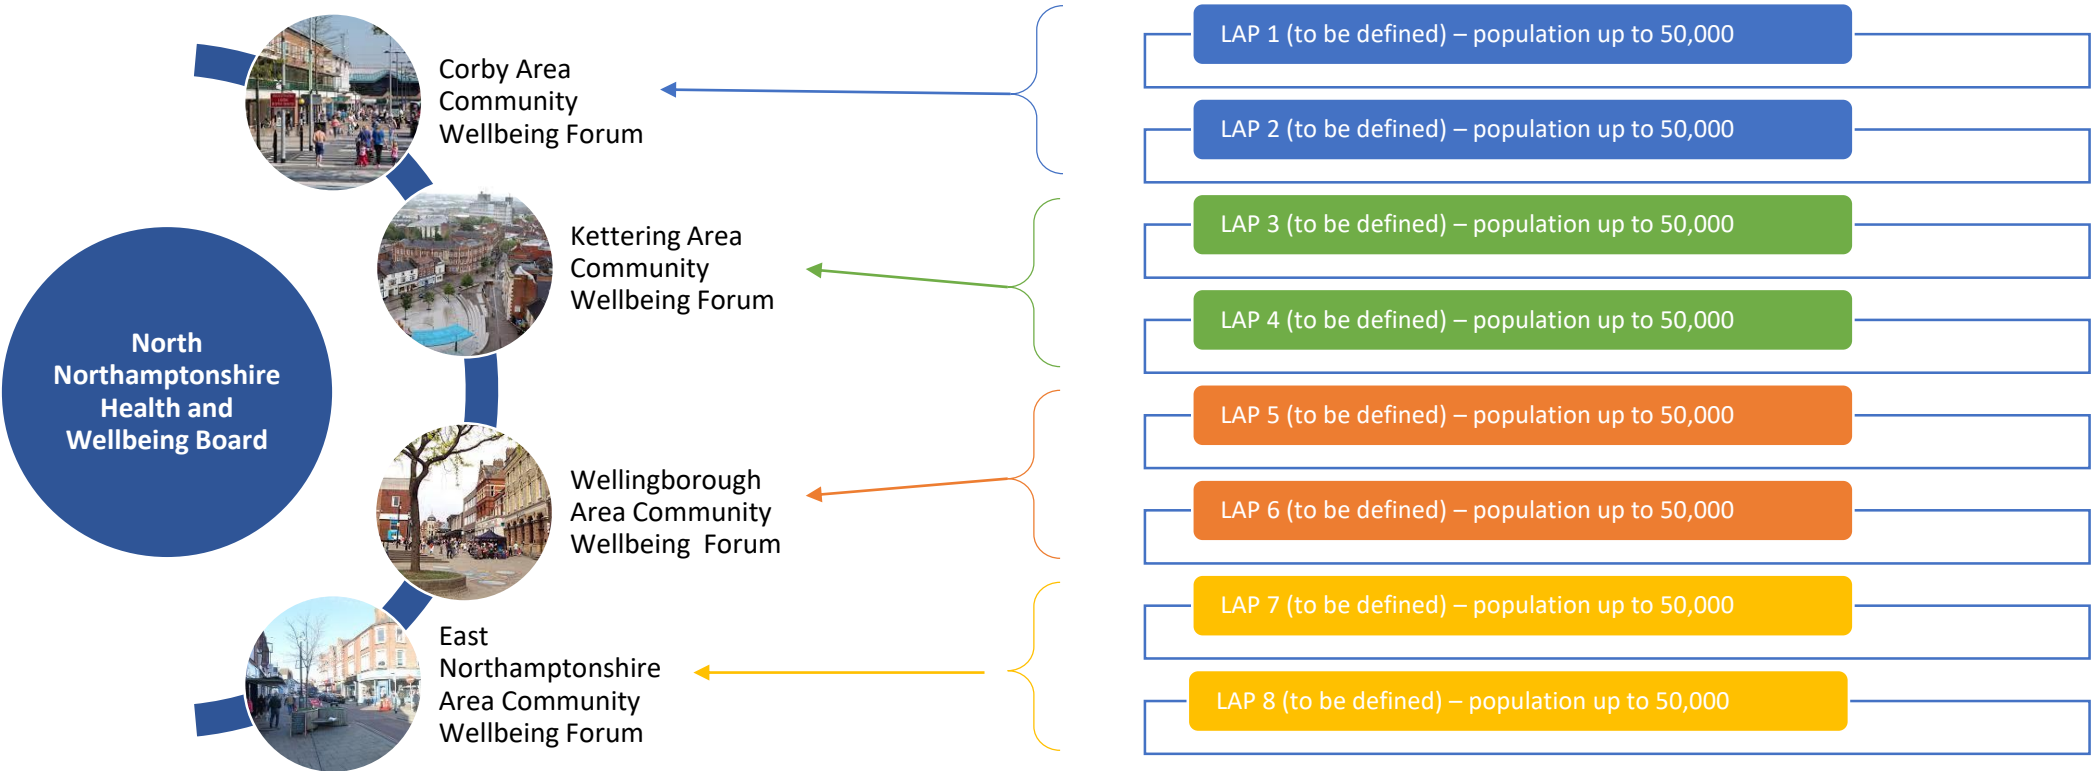

Integrated Care Partnership

North Northamptonshire Health and Wellbeing Board

General practitioners/PCNs - Interest Groups - Neighbourhood Groups - Faith Groups  
Schools - Communities of interest - Elected members - MPs - Public Sector orgs

← Strategy | Delivery alongside collaboratives →

# Area Community Wellbeing forums and Local Area Partnerships

# Community Wellbeing Forums and Local Area Partnerships

## Community Wellbeing Forums:

- ❖ 4 Forums that enables local leaders and communities to influence policy and strategy development and understand the work of the Local Area Partnerships (bringing together the voices of populations between 60,000 – 100,000)
- ❖ A place to share ideas, hear about initiatives, engage with partners
- ❖ Moves the ability to inform and influence decision making closer to local people and local needs
- ❖ Gives opportunities to focus on social and economic determinants of health
- ❖ Each Community Wellbeing forum will have places at the Health and Wellbeing Board

## North Northamptonshire Local Area Partnerships

- ❖ 8 Local Areas across North Northamptonshire, based around sovereign council footprints, urban and rural areas – (to be finalised based on data and insight profiles)
- ❖ Supporting populations of between 30,000 – 50,000
- ❖ Small enough to provide personalised support, but large enough to make sure residents can use the range of services they need and for services to organise and take advantage of scale when necessary
- ❖ Each Local Area recognised as unique and individual with variety of assets (people, organisations and buildings and physical places)
- ❖ Services and support organised around the profile of the local areas including wider determinants
- ❖ These partnerships should be predominantly represented by people and organisations that deliver and are able to shape and mould support to best meet desired outcomes

# Local Area Wellbeing Forums and Partnerships

**1** Data and insight profiles will be developed for that Local Area that describes the strengths and assets of the area alongside its issues and challenges. The profile will be the evidence base that informs the activity of each Local Area Wellbeing Partnership.

**2** Each Area Wellbeing Forum will provide a forum for local elected members, residents, statutory organisations and the community and voluntary sector to engage and influence both delivery and strategy in a way that reflects the needs of local populations. Local Area Partnerships will be a set of arrangements that link up the ICS collaboratives and the forums in a way that is agile and influences and delivers

*Five potential responses to identified need*

**3**  
**Peoples Charter/local deal**

**4**  
**Devolved monies to fund specific local responses to identified Neighbourhood need**

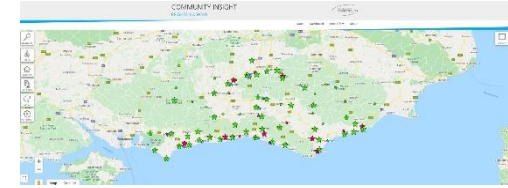

**5**  
**Local direct response through improved collaboration & Integration between local organisations working within that area**

**6**  
**Place wide response where need is beyond that which can be tackled within a Neighbourhood**

**7**  
**System wide response where need is beyond that which can be tackled within Place**

An example of Neighbourhood profiles can be seen through the following link

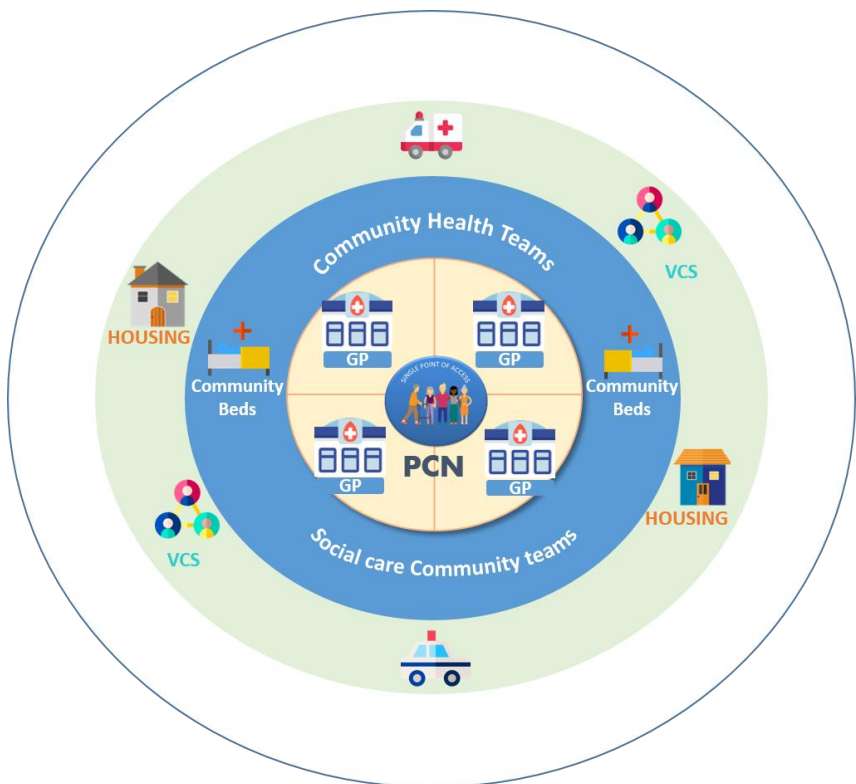

[Local Insight \(communityinsight.org\)](http://communityinsight.org)

## How Neighbourhood Partnerships would work:

- **Local Wellbeing Partnerships (x8)** which bring together elected members residents, voluntary and community and statutory organisations to help coordinate and respond to identified local needs to deliver the integrated care strategy.
- Underpinned by a **co-produced People charter/local deal** which outlines commitments between citizens and partners to work together.
- **Resource light in terms of administration** to support functioning of partnership within each area.
- Some **responsibility in directing funding to priorities** based on identified need – but not all services would be commissioned or budgets devolved at a the most devolved level when scale makes sense.
- **Local Partnership leadership** from elected members residents (“school governor type model”), statutory / voluntary providers and/or PCN Clinical Directors.

# Community Hubs

<b>Teams / Partnerships</b>	1. Primary Care Network (including MDT welfare teams as part of iCAN collaborative)	8. Housing Teams
	2. Adult Social Care – Community teams	9. Welfare Benefit & Debt
	3. Community Nursing	10. Learning Disability and Autism Team (collaborative)
	4. Community Therapy (WNC and NHFT)	11. Mental Health (collaborative)
	5. Community and Voluntary Sector	12. Neighbourhood policing
	6. Ageing well/Supporting Independence Social prescribing (iCAN collaborative)	13. Community safety.
	7. Children and Young People’s services (CYP collaborative)	14. Community spaces, sport and leisure

...but not just services - flexible space – welcoming – at the heart of the community – but with hubs come spokes – how should they work and what are the opportunities?
